Nic – Attached are my comments/suggestions/questions. PolRep looks really good. It probably looks like a lot of changes, but just moved some info to match the PolRep guidance and made a few suggestions. Since Ruhl is reviewing some of the Oil PolReps and I will be doing the others, I want us to be consistent. I would appreciate any input you have on PolReps. You write a good PolRep.

Let me know if you have any questions or concerns. I used track changes for ease of review.
